Microsoft Office Professional Academic contains all the essential tools for all college students to do their homework, express their ideas, do professional projects and take notes efficiently. Ideal for: Students of universities and colleges Microsoft PowerPoint is a top-of-the-list power-point presentation-creating application. It gives you the freedom to create presentations for different types of audiences. You can manage images and other media files in the background, and add web links, sounds and videos to your presentation to spice things up.

Microsoft Excel is a powerful analysis tool, which lets you perform calculations, make charts and graphs, handle large amounts of data and do accurate calculations. Microsoft Word is a top text-editor with many useful features. You can create text documents and save them in different file formats. It also helps you manage your time, manage your writing tasks and brainstorm for creative ideas. Microsoft Outlook is a communication and calendar application that helps you stay in touch with friends, family, colleagues and other contacts. A computer used by college students can do much more than just present media

files, edit text and create spreadsheets. From online education to coding, these devices can also help you stay organized, learn new skills and stay connected with people around the world. These requirements are much higher than what any “home computer” can deliver, and as such, these devices are usually provided to students by their respective universities, colleges, employers and other institutions. In most cases, students can choose among several devices to help them accomplish their tasks, depending on the price they’re willing to spend. All these devices can also be used for other things than just completing assignments

and creating projects. For example, there are various apps which allow you to design your own drawing or photographs. These applications make it easy to create beautiful images, customize them and share them online. Additionally, there are numerous websites which allow you to upload your work and draw attention from a broad audience. Another interesting way to utilize these devices is by creating unique games, which are designed to help you relax or concentrate, work out or engage in various sports. You can download such games for free from various websites and social networks, or create your own

using the tools provided by the respective devices. What is the Academic version of Microsoft Office? Microsoft Office Academic provides you with all the essential tools to help you complete your assignments and projects. You can write text documents, create spreadsheets and presentations, manage your e

AcceptKatrina Kaif says actor-director Karan Johar's love for her is genuine The 26-year-old actress in an interview for the Times of India talks about Karan Johar's 'Believer' and 'Student of the Year' Mumbai: Actress Katrina

Kaif recently spoke about actor-director Karan Johar's love for her is genuine. During an interview for the Times of India, the 26-year-old actress said, “He (Karan Johar) is a fantastic person, and he has amazing passion towards me. He (Karan Johar) has always been great to me. And I love him for his love for me. He has this great, immense passion. It’s not fake. And I don’t want to hide anything. And he is nothing but loving to me and I hope I’ll reciprocate the same way.” The 'Kurkure Bhawani' actress also spoke about her relationship with actor Arjun Kapoor. The actress is currently married to Arjun Kapoor and is

expecting their first child. The actress is working on the film, 'Believer', directed by Karan Johar. When asked about her personal life, the actress said, "I think every actor has gone through that (of being in a relationship). But I think my career is very important for me
