New Horizons is an interactive VR love story set in the distant future. Be welcomed into the chaotic life of the Haka tribe, a community of optimistic robots, violent insects, a lonely robot lion, and a wise old man who has a knack for getting into trouble. The game was produced with the help of WIRED Nordic, a Norwegian VR/AR studio created by ex-NASA engineers, which is known for creating cutting-edge experience for brands like TimeHop, SEGA, Samsung, KAYAK and Discovery Channel. Storyline: All trees have been replaced by human apartments and skyscrapers. Love, friendship and empathy can now only be found in New Horizons - a city designed to serve the present, oblivious to the woes of the past. Flashing lights, neon signs and loud noises seek to distract Haka and his friends who are hoping for a quiet life. Despite the chaos of the city, the main protagonist, Ovi, finds happiness with a fellow robot and is happy with his peaceful life. But life in the city is destined to be disrupted. An insect goes missing, Haka and Ovi's city is placed under a quarantine, and Ovi learns that another robot in New Horizons, his ex, has gone missing. Features: Interact with a large variety of characters by tactically placing, moving and sizing robots throughout the Haka's floor Six unique, detailed

environments with changeable weather and lighting Remotely control three robotic companions Enjoy dynamic and immersive sound effects High quality models and lighting Large variety of scenes, 60 short scenarios and 15 long ones Easily customizable camera position, camera movement and viewpoints High quality voice acting Career for the main protagonist Realistic combat Magneto-optic robots Realistic flashlight and torch Engaging storyline A female robot to accompany the main protagonist Robots can be equipped with different skills and have different personalities Robot development during gameplay Use the tools of Haka to repair, build, craft, upgrade or weaponize robots Build your own apartment in multiple cities Recommended VR Headset: Virtual Reality Headset has minimal motion feedback and a wide field of view. If a wider field of view is important, we recommend Vive Pro. If you are planning to use Stereo 3D goggles such as Oculus Rift or HTC Vive, we suggest Vive Pre instead. Recommended Desktop Monitor resolution: We recommend a resolution of 1440p or 2K. Please note that this

The Fall of Lazarus is a sinister mystery wrapped around a grimy sci-fi horror centered on the legend of Lazarus rising from the dead. A man, responsible for his wife's death, embarks on a journey to uncover the truth by investigating his wife's last days. All the while, Lazarus is walking through the city with a crown of thorns, ominously calling out, "Who wants to be King?" In a world where technology gives, "Yes we can." Humanity questions, "What's the point?" This is THE Fall of

Lazarus.A chilling psychological exploration of the dark side of dreams, memory and grief. The Fall of Lazarus is a first-person game inspired by the myths and legends of the world. Living in an alternative post-apocalyptic/dystopian California where robots police people and controlled by electronic implants, augmented humans live in fear of the machines. The human soul has been taken from people and replaced with a fake digital soul called "soul points", killing the soul, and turning humans into soulless cyborgs. The only other living being is Lazarus, a mysterious, tall, and strong man, who performs healing sessions for soulless humans, which is against the law. It is at these sessions that the player can observe the unseen crime that the soulless people committed to obtain their implants that make them differ from the rest of the humans. The player receives information on the case during their sessions with Lazarus, and must find the solution to ultimately free the people from the evil electronic machines that stole their soul and make them soulless.The Fall of Lazarus is a first-person game that makes the most of its unique mechanic that lets the player experience the same sensation as their soulless friends and watch the game from the inside. The Soulless Mob is the game's main antagonist, a group of soulless people who perform illegal operations to get their implants, that are

depicted as robots with eyes on their backs. Any soul point they steal from humans is used to get their implants, which are illegal to restore the soul points to the humans they stole it from, creating a never-ending cycle of theft, reclamation, and fear of the machines. According to Elias, the only person that can fully restore a person's soul is Lazarus and he can only use his power to free the soulless people, but it is no easy task. What's New in Version 1.5.4.94119 Fixed a problem in which keyboard and mouse were not usable when you rotated the touchscreen. In version 1.5.4.93119, we updated the game mode "Your Own" in order to adjust the conditions for each different device.The band has been around a bit longer than some of the other bands featured in this review. Arson City started in New Jersey in 1995 and recorded their first record, "Age of Anxiety", six years later in 2001. While they released several albums throughout this time, they always maintained an intense focus on their live shows. The fact that they've been together for almost a decade shows. Indeed, they're one of the longest standing acts on

the heavy metal superstar fest. "Seconds To Minutes" is yet another enjoyable album from Arson City. The band uses a much lighter sound than their previous album, but has a tightness to it that keeps it fresh. Add in the quartet's vocals and you've got a winning combo. 01. Our Time Is Up 02. ING APART Table of Contents Miles Benjamin As waters join, so are nations torn: fear and loathing of terrorism unite China and Rome By Kwangcheol Jeong A year ago, the economic crisis and the snow and rain have brought a sustained chill to the Chinese soul. Soaring stock prices and the seemingly unchecked rise of China's economy have made the country a world leader, but little of China's economic boom is visible in the hinterland. And now, at a summit of Chinese and Italian leaders, the tremors of growing dread of domestic and international terrorism have forced the relationship of those two neighbours on and off to centre stage. China has tolerated small outbreaks of Muslim separatist terrorism in its Xinjiang province since the late 1950s, with Uighur separatists increasingly emboldened since the late 1980s. But the events of last August caught China off guard. Then, less than two weeks before China's 70th anniversary of Communist Party leadership, a group of three Uighurs terrorized the city of Kunming in southwest China with a series of bombings and assassinations, including the attempted shooting down of a military plane loaded with 100 cadres. Most people survived, but several died and the Chinese military shot and killed eight Uighur suspects. The impact on politics was great enough, but that was only the beginning. Inflammation of anti-Chinese nationalist sentiment in the Islamic world led to rioting in Malaysia and the Philippines. In Indonesia, Islamist terror splintered a governing coalition, a parliamentary election was postponed, and tensions in the war-torn Aceh province multiplied. In response, a group of Chinese intellectuals, in part fed up with the control they felt they had to endure, formed a group with a less than "progressive" agenda. They were known as the Team of 88. They called for political reform and for an end to the People's Liberation Army's monopoly on power, but the group also included elements with connections to Beijing's security services. In October, the group warned against a military build-up and

called for an end to three decades of "vicious" Communist Party rule. Then, in November, they organized a secret meeting in Beijing with representatives from an international security association known as the World United Against Terrorism. Another meeting that took place in Guangzhou in late January led to a joint statement with the United Nations that laid out "concrete measures" to prevent "terrorism" until China had

Blackout is a horror game designed around endless tension. You can play the game offline by yourself. It is easy to understand the game rules but Blackout is not an easy game to win. Within 12 minutes, you must endure various terrifying situations. You'll need to use all your experience in horror to survive. You will come to realize that there's more in life than beating your opponents. And if you are getting freaked out, that's not the problem. It's your pathetic soul and the lack of will to overcome terrifying things. =========== You can win the game by hitting the joker, avoiding contact with the monsters and evading clutches of The Devil and his minions. You'll be able to make him retreat. Even though you are pretty well prepared to survive that encounter, it's still your life you are playing for. If it goes wrong, you'll be sucked into the abyss and meet your own fate. If you survive the encounter, you'll probably be scarred for life. Discover the game rules in the beginning of the game. Then, it's time to face your fears and find out whether you can beat The Devil's minions. If you manage to survive the encounter, you will have the lead in the match. If you lose, it'll be the time for The Devil to come in. You can avoid him by successfully retreating in one of your turns. He doesn't have to attack you. But if

he does, you have a chance to retreat. Even though you may be under attack, you can still run. If your retreat is unsuccessful, you will be defeated. Find out your fate in the end of the game. You can win the game by hitting the joker, avoiding contact with the monsters and evading clutches of The Devil and his minions. You'll be able to make him retreat.
