The moon is about the same age as your brain. Yes, the moon is 4.52 billion years old! If you guessed it was younger, well done! But at what age did the moon form? The moon formed from the debris of a solar system collision with another solar system. It is therefore believed that the moon formed around the same time as our Earth. So, the moon is about 4.52 billion years old. Read on if you want more information on the moon's origins.As we celebrate our 10th year anniversary, our season is already marked by the birth of many significant and valuable collaborations. Here is a collection of the ones that directly or indirectly impact us and the ones we are proud of: -Mycroforest and Pull-Up, are creating a series of interesting, multi-functional and eco-friendly products made of recycled content and designed to give you hours of enjoyment. -Currently on Kickstarter, the green audio-electronics company Audiolab is on track to start production of its first product, the Audiolab Pi - their first product to work on both iOS and Android. -The company that has a footprint in the market of furniture, manufacturing, and retail, is not new to social entrepreneurship, having already been a partner in the Bamboo Forest Foundation's activities and being among their most valued supporters. Now, Good Farmer has just joined
